

The centre hopes to:

- ◆ Give power to the community by providing them with the first steps and a plan which can help them to access project management and other training and support.
- ◆ Support community-based health workers, volunteers and assist them to provide a more professional service.
- ◆ Offer transport to medical care for deprived people in need of AIDS treatment
- ◆ Undertake research and evaluation work to strengthen local plans
- ◆ Offer access to other partnerships and networks as well as possible donors.
